EXPERIENCE

MPHASIS LTD   **JAN 2022-PRESENT**

MPHASIS INTERNAL [AMOD]

Contributed significantly to internal projects within the Application Modernization
(AMOD) team at Mphasis, engaging in manual data analysis and web page design using Python and related technologies.
Key Responsibilities:
Manual Data Analysis: Conducted thorough manual data analysis, extracting insights and trends to inform decision-making processes for internal projects within the AMOD team.
Web Page Design with Python: Designed and developed web pages using Python
and associated technologies to create user-friendly and visually appealing interfaces for internal applications.
Collaboration within AMOD Team:Worked collaboratively within the AMOD team to understand project requirements, align data analysis findings with development goals, and deliver effective web solutions

CLIENT: JP MORGAN CHASE

Played a pivotal role in the development and enhancement of frontend solutions using Adobe Experience Manager (AEM) for a high-profile client within the financial sector, specifically JPMorgan Chase.
.

Collaborated closely with cross-functional teams to deliver robust and user-friendly web applications tailored to the unique requirements of the JPMC client

Key Achievement:

AEM Customization for JPMC:

Engineered custom AM components and tailored frontend solutions to align with the specific needs and branding guidelines of the JPMorgan Chase client.
